SUMMARY

Nebraska institutions of postsecondary education reported a total headcount enrollment of 103,813 in 1988 as compared to 100,454 for the previous year. All sectors reported an increase with a 3.3% gain for the University of Nebraska, 1.5% gain for the state colleges, 4.7% gain for the technical community colleges and a 2.8% gain for the independent colleges and universities.

Enrollments increased at both the full-time and part-time levels, with full-time enrollments showing a 2.0% gain, and part-time enrollments gaining 5.0%.

The number of women enrolled as compared to the number of men remained at 53% to 46% respectively.

The number of first-time freshmen increased 609 (4.75%) continuing the upward trend noted in the 1987 Enrollment Report.

When viewed over a five-year period, total headcount enrollments increased by 5,899 (6.0%), full-time enrollments were comparable with less than 1% difference, and part-time enrollments increased 5,621 (13.9%). Five-year trends show the University of Nebraska with a 470 decrease (-1.7%) in full-time, an increase of 959 (7.2%) part-time; state colleges with increases in both categories, 1,046 (11.4%) full-time and 627 (1.3%) part-time; technical community colleges with increases in both categories, 248 (2.9%) full-time and 4,288 (25.0%) part-time; with independent colleges and universities reporting decreased enrollments at both levels, -546 (-4.4%) full-time and -273 (-5.5%) part-time.

Included in this report is a partial listing of enrollments from Nebraska Private Vocational Schools. Thirty surveys were mailed, with eighteen responses, reporting enrollments of 3,176.

PREFACE

The information contained in this report was supplied by the Nebraska institutions of postsecondary education as a part of the annual collection of data requested by the United States Department of Education.

This report reflects data collected under the Integrated Postsecondary Education Data System (IPEDS) which replaces the Higher Education General Information Survey (HEGIS) formerly used for this purpose.

Data on ethnic categories are included in the Fall Headcount Enrollment Reports on a biennial basis and are reported on even-numbered years.

The data in this report (Fall Headcount Enrollment 1984 through 1988) were taken from the following reports:

Fall 1988:	Fall Enrollment 1988 (IPEDS)
Fall 1987:	Fall Enrollment 1987 (IPEDS)

Fall 1985:	Fall Enrollment and Compliance Report of Institutions of Higher Education - 1985 (HEGIS)
Fall 1984:	Fall Enrollment in Institutions of Higher Education - 1984 (HEGIS)

The Nebraska Coordinating Commission for Postsecondary Education coordinates the distribution and collection of these reporting forms to the institutions for transmittal to the United States Department of Education.

We wish to acknowledge with appreciation the cooperation and time spent by the institutions in reviewing and verifying the data contained in this report.

INTRODUCTION

Fall headcount enrollment reporting is only one of several types of enrollment that might be used in analyzing patterns at the institutional, sector, state or national level. Depending upon the question being asked, the following counts might be appropriate: fall headcount, unduplicated headcount over a fiscal year, full-time equivalency, etc. Each type of enrollment count tells the reviewer something different about the statistics.

Fall headcount enrollment is normally used as an indicator of trends among and between institutions. The fall period is the time in which traditional collegiate institutions experience their peak enrollment period. Thus, by comparing one fall enrollment period with another, the reviewer can get a general understanding of whether the enrollments are increasing and the postsecondary educational enterprise is expanding, or whether enrollments are decreasing and the enterprise is contracting. Changes in student enrollment patterns also may be inferred from fall headcount statistics.

PREFACE

The information contained in this report was reported by the Nebraska institutions of postsecondary education as a part of the Integrated Postsecondary Education Data Systems (IPEDS). The IPEDS financial statistics report is part of a series of reports institutions annually file with the National Center for Education Statistics (NCES) of the U.S. Department of Education. The Nebraska Coordinating Commission for Postsecondary Education coordinates the distribution of the IPEDS reporting forms to the institutions, the collection and return of completed reports for the National Center for Education Statistics.

This report reflects information from one of the six groups of funds generally managed by institutions of higher education. The fund group included herein is the Current Funds. Not included are revenues and expenditures related to the other five fund groups: Loan Funds, Endowment and Similar Funds, Annuity and Life Income Funds, Plant Funds, and Agency Funds. Each of the fund groups are defined below.

The Commission wishes to acknowledge with appreciation the cooperation and time the institutions devoted to reviewing and verifying the summary data contained in this report.

INTRODUCTION

The financial information contained in this report reflects institutional Educational and General revenue items and Education and General Expenditure items.

By definition, Education and General Revenues include current fund revenue from: Tuition and Fees; State Appropriations, Local Appropriations, Federal Appropriations, Grants and Contracts; Other Gifts, Grants and Contracts; Endowment; and revenue from other sources. It excludes revenue from the Sales and Services of Auxiliary Enterprises, Sales and Services of Hospitals, and income from Independent Operations. These data were taken from Part A of the IPEDS financial statistics report.

It should be noted that both restricted and unrestricted forms of revenue are included in the Current Fund Education and General Revenue Total. Due to the inclusion of restricted institutional revenue, the revenue data reported in this report may be different from budgetary information reported by some institutions.

Instructions for Part A. Current funds revenues include all unrestricted gifts and other unrestricted revenues earned during the fiscal year and restricted current funds to the extent that such funds were expended for current operating purposes.

Education and General Expenditures, by definition, includes current fund expenditures for: Instruction; Research; Public Service; Academic Support; Student Services; Institutional Support and Operation and Maintenance of the Physical Plant; Scholarships and Fellowships; and Educational and General Mandatory Transfers. Education and General Expenditures excludes expenditures related to Auxiliary Enterprises, Hospitals, and Independent Operations. These latter three items are included, however, in Total Current Funds Expenditures and Mandatory Transfers reported by the institutions. These expenditures data were taken from Part B of the HEGIS financial statistics report.

As with the revenue portion of this report, the expenditures include restricted and unrestricted current fund expenditures. The inclusion of both types of expenditure for the functional areas shown may cause these data to be slightly different from the budgetary data reported by some institutions.

SUMMARY TABLES

The two summary tables which follow compare the current fund education and general income (revenue) and expenditures for the fiscal years ending 1984 and 1988. It should be noted that the amounts have been rounded to the nearest one thousand dollars. Table I displays current fund education and general income, Table II displays education and general expenditures for all institutional sectors for the two years identified above.

The third column of each sector, and the state totals, should be read across, rather than vertically. The four-year changes show both the change in dollar amounts and percentage.

Those who review these data are cautioned from drawing too specific interpretations from these summary tables, as they do have limitations. The data reported are limited by institutional and state policies, which may have changed during the time in which these are reported, that would affect the information shown. While the reporting instructions are the same for each institution, they are sometimes interpreted differently by some reporting officers which would affect the data. In addition, personnel in the offices reporting these data may have changed and this may lead to one individual reporting the data differently than his/her predecessor.

FULL-TIME INSTRUCTIONAL FACULTY DATA:
NEBRASKA INSTITUTIONS OF POSTSECONDARY EDUCATION
ACADEMIC YEARS 1984-1985 THROUGH 1988-1989

Nebraska Coordinating Commission for Postsecondary Education

February, 1989

SUMMARY

Two hundred one fewer faculty members were reported this year as compared to those reported a year ago, 2,606 as compared to 3,405. Average salaries over the one-year period increased $2,400 from $29,439 to $31,839 (8%).

Percentage changes for the various postsecondary sectors were as follows: University of Nebraska, 7% increase in the number of faculty and 9% increase in average salary; State Colleges, 2% increase in faculty and 11% increase in average salary; Technical Community Colleges, 2% increase in number of faculty and less than 1% change in average salary; and Independent Colleges and Universities, 11% increase in number of faculty and 8% increase in average salary.

Over the past five-year period, the number of faculty in all Nebraska postsecondary education institutions has remained stable, 3,612 in 1984-85 as compared to 3,606 in 1988-89. During the same period, the average salary increased from $26,513 to $31,839 (20%).

The percentage of tenured faculty showed no change, 53% for both years.

Women faculty represented 26% of the total faculty in both 1984-85 and 1988-89. Women represented 6% of the total number of professors in 1984-85 and 9% in 1988-89, 20% of the associate professors in 1984-85 as compared to 19% in 1988-89.

During the same five-year period, the average salary for men professors increased by 22% as compared to 16% for women; the average salary for men associate professors increased 19%, while the average salary for women associate professors increased 22%. Salaries for men at both the professor and associate professor ranks remain above those of women of comparable rank.

Please Note: The University of Nebraska-Lincoln has instituted a new method or reporting due to the installation of a new accounting system. As a result, comparison of information submitted this year with that of previous years may not yield expected results. Any analysis of trend should take the above into consideration.

PREFACE

The information contained in this report was reported by the Nebraska institutions of postsecondary education as a part of the Integrated Postsecondary Education Data System (IPEDS). The IPEDS full-time instructional faculty report is part of a series of reports institutions file annually with the National Center for Education Statistics (NCES) of the U.S. Department of Education. The Nebraska Coordinating Commission for Postsecondary Education coordinates the distribution of the IPEDS reporting forms to the institutions, and collection and return of completed reports for the National Center for Education Statistics.

The Commission wishes to acknowledge with appreciation the cooperation and time the institutions devoted to reviewing and verifying the data contained in this report.

The material presented in this report is open for comment and discussion and is provided for general information purposes to the Governor, the Legislature, and the Nebraska postsecondary education community. Comments should be directed to:

INTRODUCTION

The following tables provide, in summary form, data regarding full-time instructional faculty. It should be noted that these data do not include all the faculty an institution may have that are providing instructional services as, for example, the data do not include information on part-time faculty. It is, therefore, inappropriate to draw conclusions from these data related to the number of Full-Time Equivalent (FTE) faculty.

Special note must be paid to the average salaries reported herein. These are nine (9) month average salaries (the normal manner used for reporting average salaries of full-time instructional faculty). The formula used to derive these average salaries is a standard nationwide formula. The formula is as follows: 9/11 x 12-month faculty Salary Outlay + 9-month faculty Salary Outlay = Total and Converted 9-month Salary Outlay. This Total and Converted 9-month Salary Outlay is then divided by the total number of faculty (in total or by the respective academic ranks) to determine the average salary. The salary data reported herein do not include the fringe benefits the faculty receive from their respective institutions.

Comparability of the average faculty salaries, by rank, contained in this report is limited also by the use of a single and general formula used for the purpose of computing the average faculty salary.

Due to the limitations cited above, these data need to be reviewed carefully and generally. While these data are being presented for information purposes, it would be a mistake to interpret too literally without investigating some of the factors behind the apparent differences among and between institutions and institutional sectors that limit the comparability of the information contained in this report.

The data presented in this report may differ from that anticipated by the reader. Some of the differences may be attributable to the following <u>exclusions</u> from data reported:

1. Instructional faculty who are employed to teach less than two semesters, three quarters, two trimesters, or two 4-month trimesters, or two 4-month sessions.

2. Instructional faculty for preclinical and clinical medicine. (Instructional faculty in all other health fields, such as dentistry, veterinary medicine, nursing, dental hygiene, etc., are included.)

3. Instructional faculty who are employed on a part-time basis.

4. Administrative officers with titles such as Dean of Instruction, Academic Dean, Dean of Faculty, Dean of Students, Librarian, Registrar, Coach, etc., even though they may devote part of their time to classroom instruction.

5. Undergraduate or graduate students who assist in the instruction of courses, but have titles such as teaching assistant, teaching associate, teaching fellow, etc.

SUMMARY

The number of degrees and other formal awards conferred by Nebraska institutions of postsecondary education show an increase in FY1987-88 as compared to those reported a year ago: 15,659 as compared to 15,486, an increase of 1.1%.

Bachelor degrees and post-baccalaureate certificates continue to account for the majority, 53% of the total, followed by degrees and awards based on less than four years of work beyond high school, 29%; masters degrees and post-masters certificates, 11%; and first-professional and doctoral degrees accounting for the remainder. A slight decrease is seen in the number of baccalaureate degrees with an accompanying increase in awards in less than baccalaureate programs.

Overall, a comparison of this year's data with that of last year is again one of stability and similarity. The largest number of degrees and awards were conferred in the areas of Business, 3,820; followed by Physical Sciences, 2,774; and Education, 2,189. A significant increase in the number of awards in the areas of Social Sciences and Business is noted (10.3% and 7.3% respectively), and a 14.2% decrease in awards in General Arts and Sciences programs.

Statistics for the four postsecondary sectors are as follows:

University of Nebraska awarded 6,192 degrees, 142 fewer than last year, representing 40% of the total degrees and awards conferred in the state.

State Colleges awarded 2,322 degrees, 130 more than last year, representing 15% of the total.

Technical Community Colleges conferred 4,294 awards, 409 more than last year, representing 27% of the total.

Independent Colleges and Universities awarded 2,851 degrees, 224 more than last year, representing 18% of the total.

Ratio of males to females remained stable over the past year: male 49%, female, 51%.

Accompanying this report is a partial accounting of the number of awards made by Nebraska Private Vocational Schools. Forms were distributed to thirty schools with

fifteen responding. Results of the survey are as follows:

Awards conferred for programs of less than 1 academic year	1,175
Awards conferred for programs of at least 1 but less than 2 academic years	893
Associate Degrees	84
Total	2,152

PREFACE

The information contained in this report was supplied by the Nebraska institutions of postsecondary education as part of the Integrated Postsecondary Education Data System (IPEDS). The IPEDS Completions Survey is part of a series of surveys which the institutions file annually with the U.S. Department of Education. The Nebraska Coordinating Commission for Postsecondary Education coordinates the distribution and collection of these surveys to the institutions for transmittal to the United States Department of Education.

IPEDS replaces the Higher Education General Information Survey (HEGIS) previously used by the National Center for Education Statistics.

The Commission wishes to acknowledge with appreciation the cooperation and time spent by the institutions in reviewing and verifying the data contained in this report.

INTRODUCTION

The number of completions shown in this report are aggregated individual program totals for respective award levels. For example, the number of baccalaureate degrees reported in the major program area of Business reflects degrees conferred in three (3) possible degree programs for this program area: (1) Business Management, (2) Business and Office, and (3) Marketing and Distribution. The reviewer of these data is therefore cautioned to keep in mind that the program areas shown are major program areas rather than individual programs of study.

The data displayed in this report show the number of degrees and formal awards conferred at the following award levels.

1. Below Baccalaureate Degrees
   a. Awards of less than 1 academic year
   b. Awards of at least 1 but less than 2 academic years
   c. Associate Degrees
   d. Awards of at least 2 but less than 4 academic years

2. Bachelor's Degrees

3. Post-baccalaureate Certificates

4. Master's Degrees

5. Post-Master's Certificates

6. First-Professional

7. Doctor's Degrees

Each of the degree levels has a number of individual programs of study, or student majors, available for institutions reporting. These have been aggregated to a general program area.

Table 2 shows the number of degrees or awards each institutional sector conferred during the respective reporting period by major discipline groupings and by classification of Instructional Program (CIP) Codes. These major groupings were derived by combining various segments of the IPEDS form.
